SMS TEXTSEGRITY

TENSEGRITY

It refers to the integrity of structures as being based in a synergy between balanced tension and compression components.
is the exhibited strensssdfasdfthat results "when push and pull have a win-win relationship with each other". Tension is continuous and compression discontinuous, such that continuous pull is balanced by equivalently discontinuous pushing forces.

- termed by Buckminster Fuller

TEXTSEGRITY

Is an altered definition from Fuller's coined term: Tensegrity. Text is applied to Tensegrity to form (TEXTSEGRITY) to define a type of SMS to screen interaction in which nodes of conversation are connected and applied as a result of a person SMS texting to the screen.
